

LABORATORY SOLUTIONS

LABORATORY FURNITURE

ADVANCELAB® PRO STEEL CASEWORK

Our floor mounted steel casework is the lab furniture of the future. It is flexible and allows infinite modifications at site with a “sliding knee space” concept. Construction uses electrogalvanised steel sheets with heavy epoxy powder coating. Quality hinges, door handles and drawer pulls lend to durability and years of trouble free use. We stock both epoxy and phenolic resin table tops to ensure quick ship possibilities to our ever growing export division.

Safety Storage Cabinets

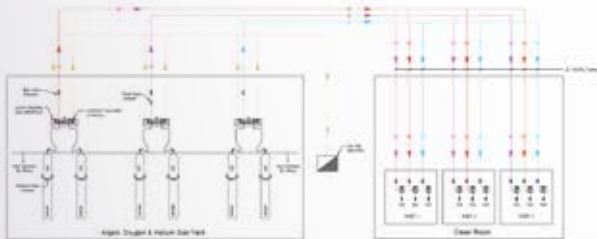

Safety storage cabinets are essential in any area where chemicals are stored. They provide a safe storage solution; allowing personnel time to escape in emergencies.

“Fume hoods are a safety device in which chemical manipulations can be performed. Potentially dangerous fumes are contained; extracted via an exhaust system and expelled to the environment where it is diluted and no longer pose as a health risk.”
